What Do Graduates (and Their Bosses) Say?

"AI won't take your job. It's somebody using AI that will take your job."
Richard Baldwin, Geneva Graduate Institute

Thanks to AI, by 2025
85 million jobs will be eliminated;
97 million new ones created...
12 additional million jobs. --
World Economic Forum

How Employers and Recent Graduates Feel About AI

Employers		Recent Graduates	
59%	say that the growth of AI has prompted them to prioritize different skills when hiring	46%	feel threatened that AI could replace their job
66%	say they are prioritizing "uniquely human skills"	55%	say my job could never be replaced by AI
79%	say employees could benefit from training on working alongside AI	52%	say new technology (AI) makes me question how prepared I am for the workforce today
68%	say their employees will need to learn new skills in the next three to five years	65%	say they are eager for training on working alongside AI
		61%	say they need to develop or strengthen their digital skills because of AI

Kevin Yee is an Associate Professor of Educational Technology at the University of Central Florida (UCF). His research focuses on technology integration in education, online learning, and social media use in higher education. He has published numerous scholarly articles, book chapters, and edited volumes related to these topics. Yee is also known for his work on the Massive Open Online Course (MOOC) "BlendKit Course," which he co-created and co-taught with Dr. Kelvin Thompson. The course is designed to help educators and instructional designers learn how to develop and teach blended learning courses

-- April 2023, ChatGPT 3.0

As of my last knowledge update in January 2022, I do not have specific information about individuals working at the University of Central Florida (UCF), including someone named Kevin Yee. It's important to note that people's positions and roles may change over time, and new individuals may join organizations.

If Kevin Yee is associated with UCF, I recommend checking the official UCF website or contacting the university directly for the most up-to-date and accurate information regarding faculty and staff members. University websites often have directories or contact information that can help you find details about specific individuals.

-- Dec. 2023, ChatGPT 3.5

Kevin Yee is the director of the Faculty Center for Teaching and Learning at the University of Central Florida (UCF). He has a PhD in German Language and Literature from the University of California, Irvine and has taught various courses in German, humanities, film, and cultural studies. He is also interested in the science of learning, interactive teaching, and AI fluency. He has co-edited a book on the intersection of VR and ethics in the college classroom.

Question 1 — 1 pts

Oxidation number of N in HNO_3

- ○ +5
- ○ +4
- ○ +3
- ○ +1

The oxidation number of nitrogen (N) in HNO3 (nitric acid) is +5. In nitric acid (HNO3), the hydrogen atom has an oxidation number of +1, and the oxygen atoms each have an oxidation number of -2. Since the overall charge of the nitric acid molecule is neutral, the oxidation number of nitrogen can be calculated:

Let x be the oxidation number of nitrogen.

$(+1) + x + 3(-2) = 0$

Simplifying the equation:

$+1 + x - 6 = 0$

$x - 5 = 0$

$x = +5$

So, the oxidation number of nitrogen (N) in HNO3 is +5.

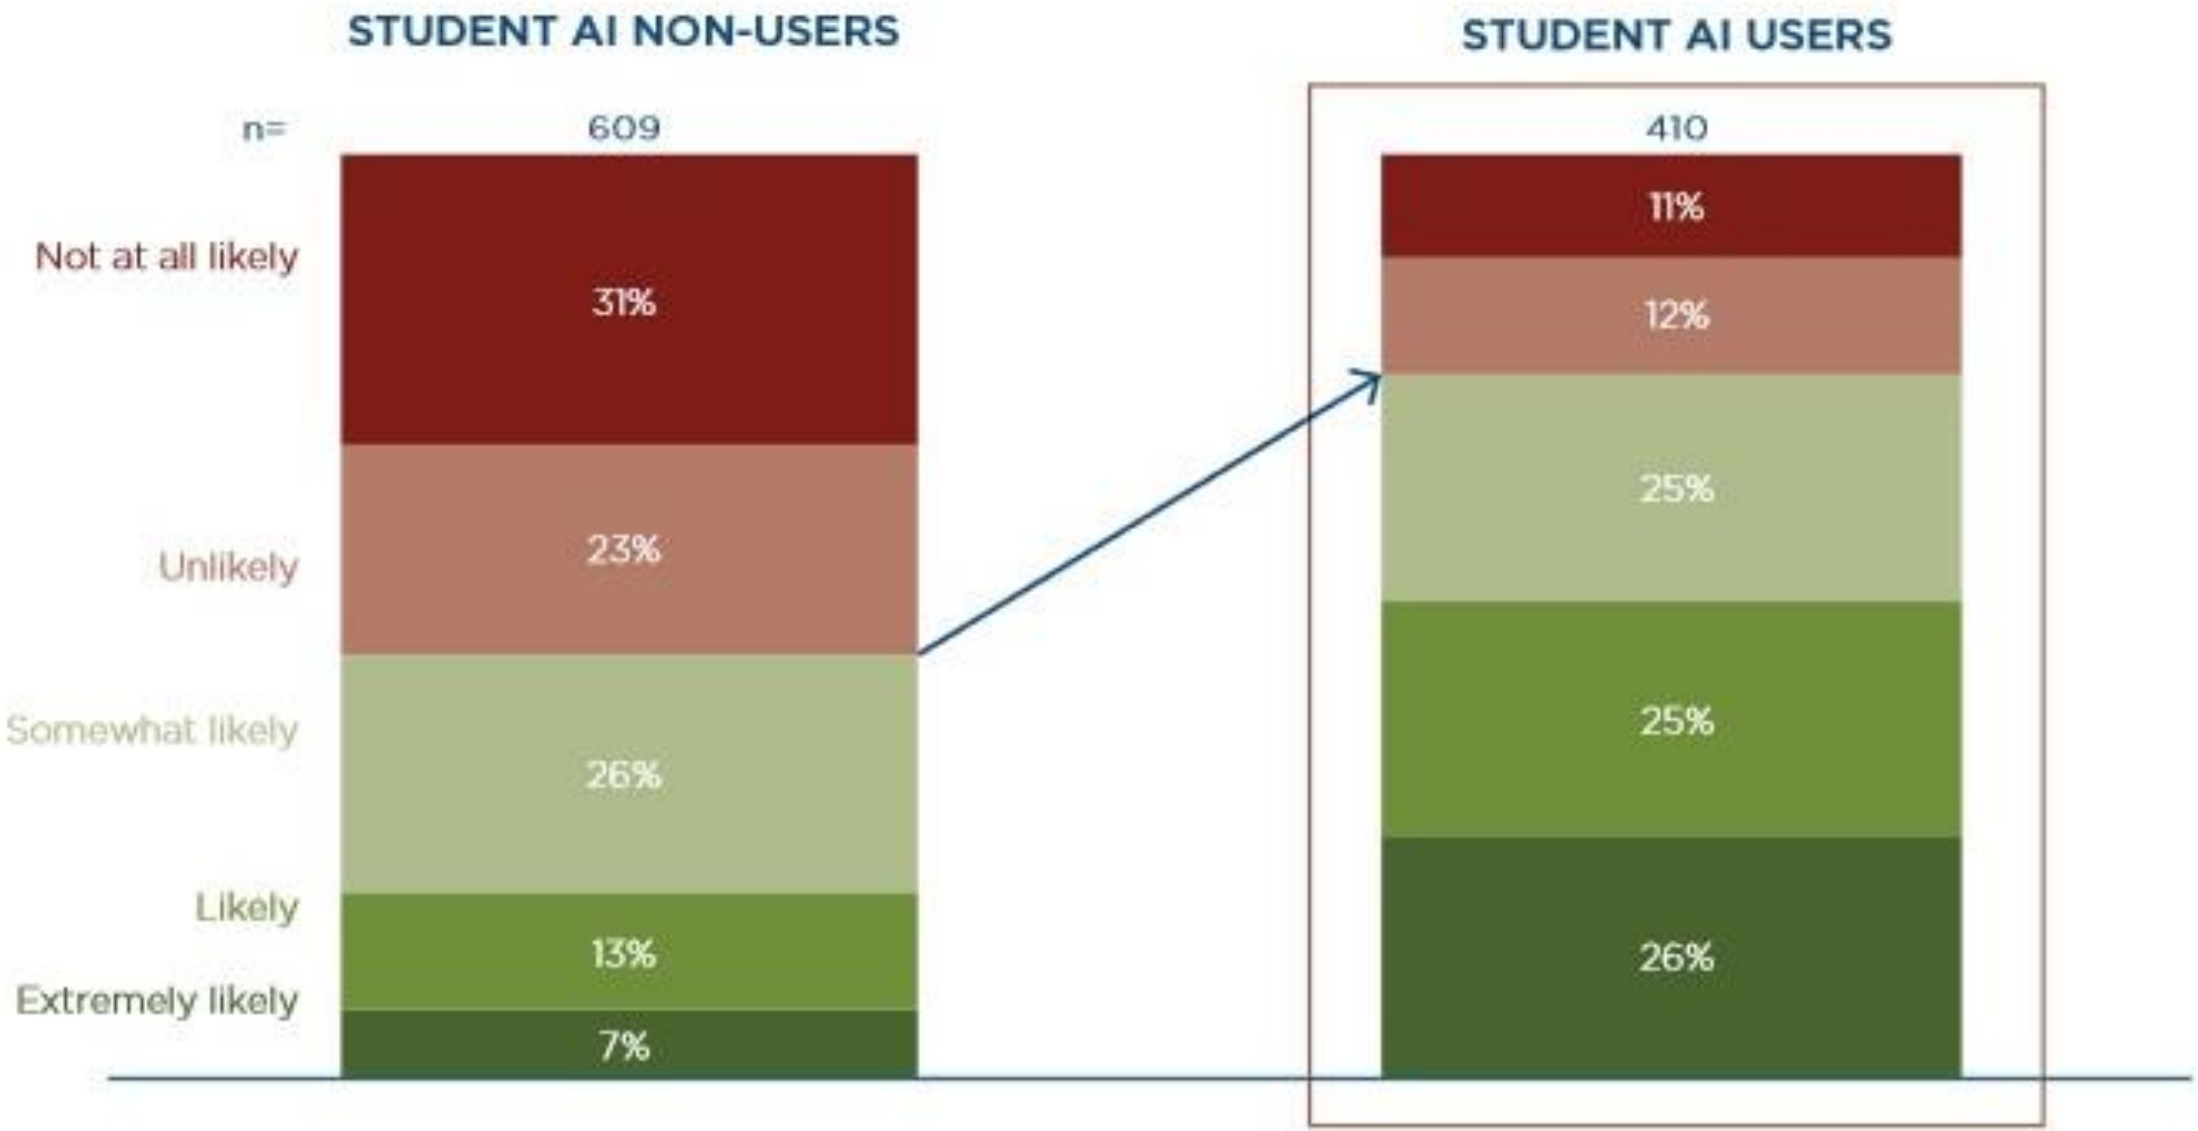
Student likelihood to use AI writing tools even if prohibited, responses as of March 2023



Why Students Cheat

1. I’m only extrinsically motivated (degree gets me a job)
2. Everyone else does it (I’ll fall behind if I don’t cheat like them)
3. It’s not morally/ethically wrong (victimless crime)
4. I’m not going to get caught
5. I need to cheat to pass (don’t have enough time)

“It’s the Wild West out there, and the students have all the horses.”

Ask me anything about this presentation

M365 Copilot (Excel) > Web-Based LLM

- Data Analysis and Insights: Copilot can analyze large datasets, identify trends, and provide insights, including generating charts and visualizations automatically
- Formula Suggestions: It offers intelligent suggestions for complex formulas based on the context of your data
- Data Cleaning: Copilot can help clean and organize data, removing duplicates, correcting errors, and standardizing formats
- Scenario Analysis: It can perform what-if analysis and scenario planning, helping you understand potential outcomes based on different variables
- Integration with Microsoft Graph: Copilot can access and integrate data from other Microsoft 365 apps and services, providing a more comprehensive analysis

M365 Copilot (Word) > Web-Based LLM

- Content Generation: Copilot can draft entire documents, including reports, proposals, and summaries, based on minimal input or existing data
- Document Formatting: It can apply consistent and professional formatting across documents, including styles, headings, and layouts
- Language and Tone Adjustments: Copilot can suggest improvements to the clarity, tone, and sentiment of your writing, ensuring it aligns with your intended message
- Summarization: It can summarize long documents or email threads, highlighting key points and action items
