

NORTHWEST FLORIDA STATE COLLEGE

Course Syllabus

Course Name: Environmental Science

Course Number: EVR1001C

Section: 10325

Location: ONLINE

Class Meeting Times: ONLINE

Credit Hours: 4

Instructor Name: Paula Viveros

Instructor Office Location:

Instructor Email: viverosp@nwfsc.edu

Course Curriculum

This course is a survey of basic chemical, biological, and physical principles of environmental science and their applications to environmental issues. This course is appropriate for students in a wide range of disciplines or programs.

Goals

Include broad learning goals such as "Students will develop an appreciation of the different genres of classical art."

Objectives

Student Learning Outcomes:

- *Students will apply critical thinking to analysis and interpretation of environmental information and model output.*
- *Students will apply the scientific method to explain natural experiences and phenomena.*
- *Students will explain the basic chemical, biological, and physical principles of environmental science.*
- *Students will use empirical evidence to describe the historical and modern context of environmental problems and their solutions.*

Student Expectations of the Course

Include what experiences students might expect to have as part of the course. Examples: The instructor will be available outside of class to answer questions. Participation is required.

How Student Performance Will be Measured

How the instructor plans to measure student performance (essays, in-class assignments, multiple choice exams, etc.)
